It asks 'How do you want to install Windows Easy Transfer on your old PC?'. There are two options: 'External hard disk or shared network folder' with a hard disk icon and 'USB flash drive' with a USB icon. Below these is a progress bar labeled 'Copying Windows Easy Transfer ...' which is partially filled with green. A red 'X' button is in the top right corner.</p>
7		<p>Unplug the USB Flash Drive when prompted to install program on old PC.</p>  <p>The screenshot shows the 'Windows Easy Transfer' window. The title bar is blue with the Windows logo and the text 'Windows Easy Transfer'. The main content area has a light blue background. It asks 'Install Windows Easy Transfer on your old PC'. There are three numbered steps: 1. Open the folder where you saved Windows Easy Transfer and write down the location. 2. Unplug the USB flash drive from your new PC and plug it into your old PC. 3. If Windows Easy Transfer does not start automatically on your old PC, browse to the USB drive location where you saved Windows Easy Transfer and double-click the Windows Easy Transfer shortcut. Below the steps is a note: 'Note: When browsing to the location of Windows Easy Transfer, remember that your drives might have different names on each PC. For example, your USB flash drive might be named E: on one PC and F: on the other.' At the bottom right is a 'Next' button. A red 'X' button is in the top right corner.</p>
